Allowable Subject Matter

2. Claims 1-26 are allowed.

The following is an examiner's statement of reasons for allowance: the invention is patentable because the prior art does not teach the essential features of having a game program simultaneously executed at each of plural terminals, including the generation of betting odds locally. Applicants' representative further asserted that the transmission of program execution states and betting odds by each terminal to a central control unit and the integration of all of the execution states and betting odds at the central control unit for retransmission to the terminals for updating and display, was not taught in the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
